TT Series**INSTALLATION**

Yale TT Series Tractor Trolleys are factory adjusted to fit the I-Beam size stated on the order. If the Trolley must be dis-assembled for installation on the I-Beam, note the arrangement of the spacers and washers for correct reassembly.

 WARNING

ALL (AIR OR ELECTRIC) POWER MUST BE REMOVED BEFORE ATTEMPTING INSTALLATION OR REPAIR.

- (a) Remove the cotter pin from the slotted hex nut on the spring rod.
- (b) Loosen the spring rod hex nut to relieve spring pressure so that the wheel will clear the I-Beam.
- (c) Install the trolley on the I-Beam. If the trolley was dis-assembled for installation, make sure it is centered on the I-Beam after reassembly.
- (d) Tighten the hex nut on the spring rod to adjust wheel pressure.
- (e) Attach trolley to the hoist with the tow fitting provided.
- (f) Make compressed air supply line connections.

PREVENTIVE MAINTENANCE**PERIODIC INSPECTION AND PREVENTIVE MAINTENANCE**

Proper care and maintenance of the trolley assembly is important for maximum safety and efficiency. Special attention should be given to the following:

- (a) Check the grease level in both sections of the trolley assembly. Add grease to the proper level when necessary.
- (b) Check unit for grease leaks and repair when necessary.
- (c) Check Tow Fitting components for wear and replace when necessary.
- (d) Blow out electric motor periodically with compressed air.
- (e) Replace worn or damaged bearings when necessary.

CORRECTIVE MAINTENANCE **WARNING**

ALL POWER MUST BE REMOVED BEFORE ATTEMPTING ANY REPAIR. DISCONNECT AND TAG WIRES OR HOSES. PULL SWITCH OR CLOSE VALVE AND ATTACH A "DO NOT TURN ON" TAG.
