Service Call Details

7. Service Objectives
Cat325/182. Send ticket with this reference number on it.

8. Services Performed
Checked dc motor. Fields have 1.8 ohms. It's about 29 degrees. Motor only generated 5.5 volts at first. Tried to flash the fields multiple times with motor not running and did the same with motor running. It started generating around 15 volts on its own and would generate over 200 as long as I held it. Motor did not start to generate the rated voltage on its own.

P8

9. Service Technician Recommendations
Pull motor and send to shop for further evaluation.
