Service Call Details

7. Service Objectives
To check pulleys vibration and cut the keys to proper length if necessary.

8. Services Performed
Moises asked if we can possibly come back Monday because he just found out that they cannot shut down so they can finish an order for California. We then asked to get as much info on the machine available to see how the machine is built on the inside. While feeling with your hand there is a big difference in vibration right where the hammer mill wheel is verses the bottom of the machine so when we come back we will cut the keys if necessary to correct length and balance the hammer mill wheel if necessary. It looks to be easy to get to.
