Conclusion

Component Failure

Cause of Failure

Bearings worn and water was inside the stator and end bell housing fits. One lead had worn insulation and require sleeving.

Comments

Bearings worn and water was inside the stator and end bell housing fits. One lead had worn insulation and require sleeving. Motor also had a live wasp nest inside attached to the rotor.

Service Tech name: Terrence Holland

Service Tech signature:

A handwritten signature in black ink, appearing to read 'Terrence Holland', written in a cursive style.
